Summary:

I am a healthy, mature minded individual with a vibrant personality, self confident and motivated. While I am about to finish the third year of a costume production degree, I also have experience working in various other performance based environments. I have a passion for creativity as well as a love for the performing Arts. I am forever attentive to my duties yet have a desire to learn new talents.

I have had a passion for costume production since a young age and whilst attending primary and secondary school I part-took in an array of stage productions, fashion shows and competitions, concerts and street carnivals. My interest followed me to my third level education where I continued to compete in fashion competitions.

I took a break from my studies for five years in which time I took the opportunity to travel round Asia and parts of Africa. I began to work as a costume maker for the Inisowen Carnival Group. I worked on all of this companies productions and eventually became the costume supervisor/designer and wardrobe manager.

I am very enthusiastic about furthering my costume production skills and I hope to pursue a full time career in this area.
